

ADVENTURE CAMP – REGISTRATION PORTAL

HTML Form Elements & Attributes – Practical Task

OBJECTIVE:

Build an Adventure Camp Registration Portal using only HTML.

REQUIREMENTS:

- Create a header with the title. Add internal navigation links for About Camp, Activities, Register, and Contact.
- Create an About Camp section with a heading, description, adventure image, and registration link.
- Create the registration form using action, method and novalidate attributes.
- Create Explorer Name and Password fields with suitable validation attributes.
- Use number and range inputs for participant details.
- Use date, time, datetime-local, month, and week inputs for the camp schedule.
- Use a color input and multiple checkbox options for adventure preferences.
- Use file upload fields with accept, required, and multiple attributes.
- Use a textarea with rows, cols, placeholder, minlength, maxlength, and required.
- Use meter for Adventure Skill Level and progress for Registration Progress.
- Add a required terms checkbox with Submit and Reset buttons.
- Create Contact links using mailto, tel, and an external link.
- Add a footer with copyright text and a Back to Top link.
