

MovieHub - Movie Booking Portal

HTML Project Task | Multi-Page Website

OBJECTIVE:

Build a multi-page Movie Booking Portal using only HTML.

PROJECT REQUIREMENTS:

1. Create a Home page for MovieHub with the brand name and welcome content.
2. Create a Movies page showing at least 3 movies: Pushpa 2, Devara, and Kalki 2898 AD.
3. Use anchor tags for navigation between Home, Movies, Shows, Offers, and Book Ticket pages.
4. Create separate movie-detail pages and connect them using View Details links.
5. Create a Shows page using a table for movie, time, screen, seat type, and price.
6. Create an Offers page using a table for offer, discount, and eligibility.
7. On the Booking page, use tables for show timings, screens, Regular/Premium prices, and Book Now links.

SUGGESTED PAGE STRUCTURE:

index.html	Home / Welcome / Quick Navigation / Now Showing / Today's Shows / Offers / Contact
movies.html	Movie list with View Details links
pushpa.html	Pushpa 2 movie details
devara.html	Devara movie details
kalki.html	Kalki 2898 AD movie details
shows.html	Show schedule and seat categories
offers.html	Available offers and terms
booking.html	Movie-wise booking tables and Book Now links
