

HTML Text Formatting Tags Task

Objective:

Create a webpage using HTML text formatting tags and understand their purpose through practical implementation. Students should learn how different tags affect the appearance and meaning of content.

Requirements:

1. Use all text formatting tags.
2. Display information related to each tag.
3. Include examples for <sup> and <sub>.
4. Show old and new prices using and <ins>.
5. Maintain proper indentation and readability.
6. Use
 and <hr> appropriately.

Expected Output:
