

TIME TRAVEL ARCHIVE

HTML Multimedia Project Task

Objective:

Build an attractive Time Travel Archive website using HTML only. The project should demonstrate multimedia elements, anchor links, div elements and iframes.

Requirements:

- Create a main page named index.html.
- Use <div> elements to organize the webpage.
- Create navigation using <a> anchor tags.
- Add Home, Prehistoric, Ancient, Future and Travel Log navigation links.
- Add at least 3 videos using <video> with controls.
- Use the poster attribute for at least 2 videos.
- Add at least 3 audio tracks using <audio> with controls.
- Demonstrate autoplay with muted on one multimedia element.
- Create ancient-world.html and display it using <iframe>.
- Create future-world.html and display it using <iframe>.
- Add a Time Travel Log section.
- Demonstrate <marquee> in a Legacy HTML section.
- Use appropriate src, width and height attributes.

Folder Structure:

File / Folder	Purpose
index.html	Main webpage
ancient-world.html	Page displayed inside Ancient Era iframe
future-world.html	Page displayed inside Future Era iframe
media/	Folder for images, videos and audio files
